👤 PROFILE

Systems-oriented full-stack engineer with 4+ years of experience developing production-level web applications, internal tools, and customer-facing portals. Skilled in API integration, ERP system design, cloud infrastructure deployment (AWS), and performance optimization. Well-versed in cross-functional collaboration, stakeholder alignment, and bilingual (English/Mandarin) technical communication. Able to facilitate discovery conversations, articulate technical specifications, and map business requirements to scalable system designs.

🎓 EDUCATION

Camosun College Certificate: Business Administration	Jan 2020 – Sep 2020 Victoria, Canada
University of Victoria BSC: Combined Major in Geography and Computer Science	Sep 2013 – Jun 2018 Victoria, Canada

🛠️ PROFESSIONAL EXPERIENCE

Freelance Contractor Protocol (https://protocol.devyuga.com 🌐) - Front-End Contractor - Led the front-end architecture development in Next.js and Sanity CMS, integrating with the Django-based backend APIs. - Specified API specs and worked with other functions to overcome integration issues. - Developed modular UI components, emphasizing scalability, maintainability, and performance. Quality Coffee Systems (qualitycoffeesystems.ca 🌐) - SEO & Performance Consultant - Performed technical performance audits and utilized structured optimization approaches on Core Web Vitals and search performance. - Set up measurable KPI tracking on GA4 and Search Console to correlate technical improvements with business growth. - Increased organic sessions by +40.5% and search visibility (avg rank 23 to 12).	Jul 2024 – Jan 2026 Vancouver, Canada
Aelen / Soapstand Front-End Developer / Operation Manager - Functioned as bilingual technical liaison (English/Mandarin) for the executive leadership and external vendors. - Translated operational needs into system workflows and integration strategies. - Managed small-scale project coordination, aligning engineering delivery with business schedules. - Developed customer-facing web portal and device UI with a focus on system reliability and field stability.	Oct 2022 – Apr 2024 Vancouver, Canada
CHSAM Leather Technology Full Stack Web Developer - Developed and implemented an internal ERP system supporting billing, inventory, and shipping. - Conducted stakeholder interviews to identify system requirements and data flow. - Designed backend systems in Grails and MySQL, implemented on AWS Elastic Beanstalk. - Aided communication with high-level executives and vendors through bilingual coordination. Tech Stack: Groovy on Grails, with MySQL as database and hosted on AWS Elasticbeanstalk	Jan 2021 – Oct 2022 Vancouver, Canada

🌐 LANGUAGES

Chinese Mandarin Native	English IELTS CEFR Level C1 - Overall Score 8.0
