PROFILE

Bilingual front-end & full-stack developer pivoting to technical sales: 4+ years of experience in building production UIs and customer-facing portals in React/Next.js and Tailwind; working with backend/API teams; and turning requirements into usable software. Comfortable leading discovery, crafting quick PoC demos, and aligning stakeholders. Fluent in English / Mandarin; degree in Geomatics (Geography + CS).

EDUCATION

Camosun College Jan 2020 – Sep 2020
Certificate: Business Administration
Victoria, Canada

University of Victoria Sep 2013 – Jun 2018
BSC: Combined Major in Geography and Computer Science
Victoria, Canada

PROFESSIONAL EXPERIENCE

Freelance Contractor Jul 2024 – present
Protocol (https://protocol.devuyuga.com) - Front-End Contractor
Vancouver, Canada

- Directed and managed the front-end development with modern, responsive Next.js web app and Sanity CMS with a Django based backend for fast data integration and high performance.
- Built intuitive UI components and page layouts to bring product requirements and wireframes into elegantly simple user interfaces with React, Tailwind, and component-driven development.
- Worked closely with backend developers to specify APIs, resolve integration issues, and deliver full-stack features with agile methodologies and proper version-control practices.

Quality Coffee Systems (qualitycoffeesystems.ca) - SEO & Performance Consultant
Drove measurable gains across Core Web Vitals, PageSpeed, and organic traffic:

- Search visibility up: Clicks +15.9% (3.52K→4.08K); Impressions +33% (176K→234K); avg position 23.1→12.
- Organic sessions +40.5%, engaged sessions +45.3%, engagement rate +2.34 pp; Active users +17.65%.

Aelen / Soapstand Oct 2022 – Apr 2024
Front-End Developer / Operation Manager
Vancouver, Canada

- Designed and implemented strategic workflows to enhance inventory tracking and streamline daily operations.
- Contributed to the development of dispenser software and user interface, focusing on functionality and user experience.
- Collaborated closely with designers and developers to build a robust, customer-facing web portal aligned with brand goals.
- Led and coordinated small-scale projects, ensuring timely delivery, team alignment, and efficient execution.
- Served as a bilingual liaison (Mandarin/English) between the CEO and external vendors/suppliers, aligning specifications, schedules, and commercial terms to de-risk delivery.

CHSAM Leather Technology Jan 2021 – Oct 2022
Full Stack Web Developer
Vancouver, Canada

- Provided language support for executives, translating and interpreting between Mandarin and English, ensuring clear and accurate communication in both directions.
- Designed, developed, and maintained internal enterprise software supporting invoice generation, inventory management, shipment tracking, and product reporting, streamlining key business operations.
- Worked closely with stakeholders and end-users to gather requirements, ensuring the final application was robust, user-friendly, and aligned with organizational goals.
